

English

The children will be reading the new power of reading text 'The Miraculous journey of Edward Tulane. Throughout this text the children will be looking at diary writing, using past tense vocabulary whilst also developing cohesion within longer pieces of writing.

Maths

We are going to be moving into a new focus and learning the skills needed to read a selection of different graphs. The children will also be learning to add different fractions together.

Science

This half term we will be looking at electricity and how it has been developed and used since it was invented. The children will also be learning about conduction and how electricity can be stored.

Computing

The children will be using computers to develop skills in data programming. The children will use a selection of programs that will develop their knowledge in computer programming.

History

Over the next half term, the children will be learning about The Victorians. During the topic we will learn about the different types of schools children went to, the poor law/work houses and the reign of Queen Victoria.

Our Spring 1
